Career Objective

Aspiring Machine Learning engineer with hands-on experience in computer vision, deep learning, and full-stack development. Skilled in building real-time AI systems using YOLOv8 and CNNs, with a strong focus on performance optimization and scalable deployment. Seeking opportunities to apply AI and software engineering skills to solve real-world problems.

Education

Pranveer Singh Institute of Technology B.Tech in Information Technology 71 %	2023 – Present
Mariampur Senior Secondary School, Kanpur (CBSE Board) Intermediate 73%	2023
Mariampur Senior Secondary School, Kanpur (CBSE Board) High School 92.2%	2021

Technical Skills

Programming Languages: C++, JavaScript, Python
Web Development: React.js, Next.js, REST APIs, MVC Architecture
Database: MongoDB, MySQL, PostgreSQL
DevOps & Deployment: MongoDB Atlas, Deployment: Render, Vercel | CI/CD Fundamentals
Frameworks & Tools: PyTorch, TensorFlow, Scikit-learn, OpenCV, Numpy, Pandas
Tools & Testing: Postman (API Testing), Docker (Basic), Git, GitHub (Branching Strategy, PR Workflow)

Projects

Collaborative Sticky Notes Application	Mar 2026- Present
- Developed a real-time collaborative notes web application for multi-user editing and synchronization - Implemented real time-time communication using WebSockets(Socket.IO) - Integrated YugabyteDB for scalable and distributed data storage - Implemented shareable links for seamless note access and collaboration	
Safe Ride AI - Helmet Detection Application	Nov 2025- Feb 2026
- Developed a real-time helmet detection system using YOLOv8 for automated safety monitoring - Enabled low-latency video streaming using WebSockets - Built a dashboard for real-time analytics and compliance tracking - Deployed scalable backend services using PM2 ensuring reliability	
Bone Fracture Detection using CNN	May 2025- Jan 2026
- Designed and trained CNN models for medical image classification - Performed image preprocessing, denoising, and feature extraction - Improved model performance using deep learning techniques - Built a simple UI for real-time prediction visualization.	
ImageIQ(An Editing Website)	Oct 2024- Jan 2025
- Developed a responsive image editing web app using JavaScript - Implemented real-time filters and client-side image processing - Optimized performance and ensured data security - Designed a clean, user-friendly interface	

Certifications

- Generative AI and CHATGPT (GeeksforGeeks) (2025–2026)
- AI Fluency : Framework & Foundation (Anthropic) (2026)
- Programming Fundamentals Using Python Part 1 & Part 2 (Infosys Springboard) (2024–2025)

Achievements

- Selected among Top 40 teams in HackWithDelhi for developing an innovative AI-based solution
- Creative Design Team Head — Led planning, coordination, and execution of event visuals
